

Ultra-strong screen protector for iPhone 15 Pro with D3O technology

SKU: TED30SCRGLIP1561P

Here are all the benefits of the D3O material screen protector for your iPhone

THE ADVANTAGES OF THE D3O SCREEN PROTECTOR: THE GUIDE TO ULTRA-STRONG PROTECTION

Choosing this **screen protector with D3O technology** for your **iPhone 15 Pro** ensures optimal protection against scratches and knocks. The innovative material used in this screen protector **greatly reduces the risk of damage** to your smartphone screen. This guide will show you all the benefits of a resistant yet discreet screen protector.

D3O INNOVATION FOR SUPERIOR PROTECTION: HERE'S HOW IT WORKS

D3O technology represents a major advance in screen protection. This protective glass, while being **thin and almost invisible**, offers exceptional impact resistance. Thanks to its ability to **absorb and dissipate impact energy**, it minimises the risk of damage to the display. After impact, **the material returns to its original state**, guaranteeing long-lasting protection.

D3O CERTIFICATION: GUARANTEE OF MAXIMUM PROTECTION

The D3O certification is not only an important indicator of quality, but also ensures that the screen protector has been **created to withstand strong impacts**, effectively protecting your iPhone's display from accidental drops and knocks.

THIN AND TOUGH SCREEN PROTECTOR: TAKES ADVANTAGE OF THE DISPLAY

Thanks to the D3O material that replaces traditional screen protectors, this screen protector offers almost invisible protection **without altering the design or touch sensitivity of the screen**. Despite the excellent protection provided, the screen protector is distinguished by its thinness and allows **unblocking via facial recognition**.

WHAT DISTINGUISHES THIS PROTECTIVE GLASS:

- D3O technology: advanced, impact-resistant material that maximises screen protection
- Transparent, thin and almost invisible screen protector
- Easy to apply without leaving bubbles
- Compatible with touch functionality and facial recognition
