sbs

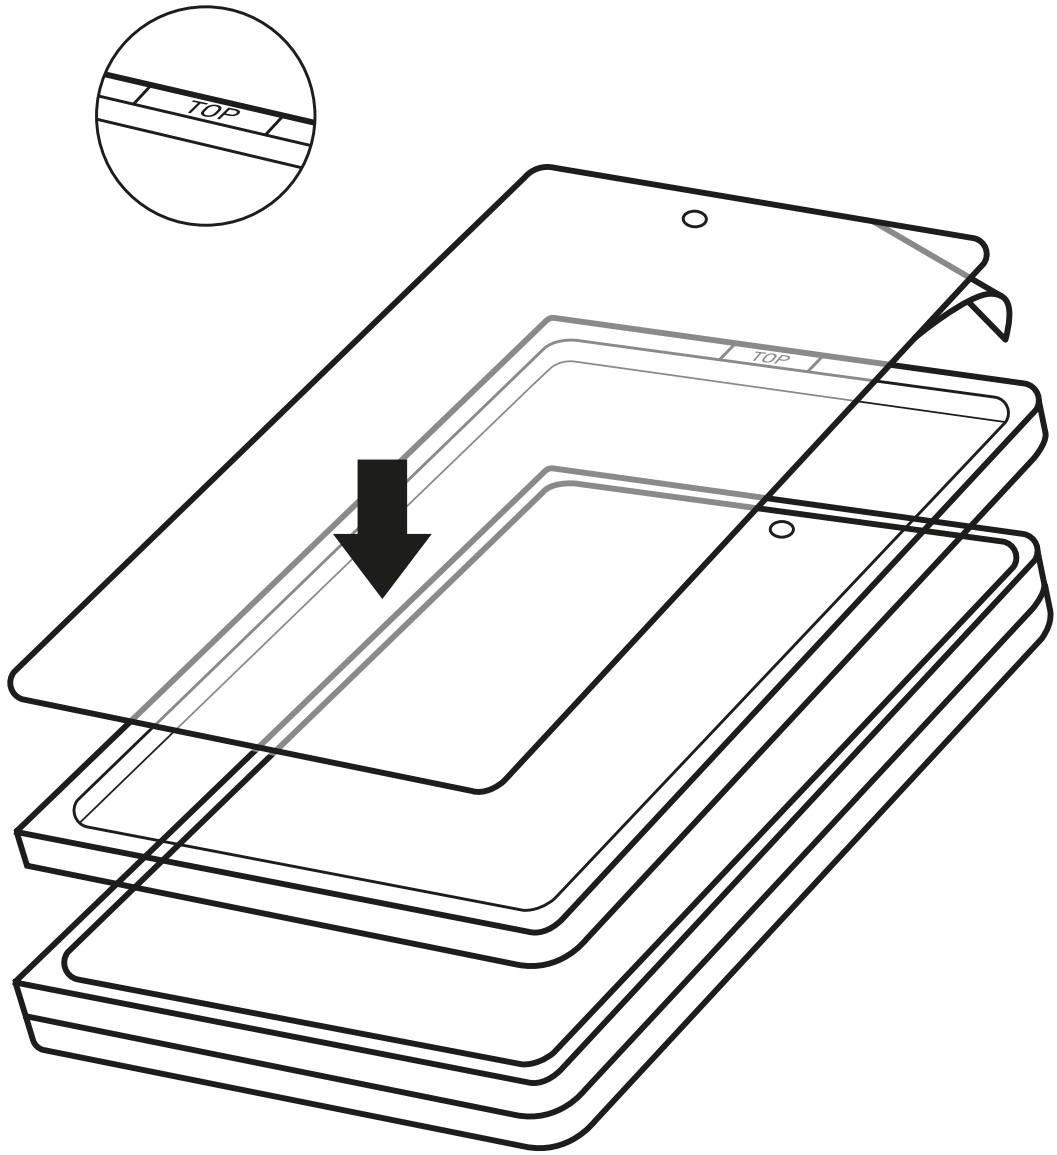

iPhone Duo

Screen Protector

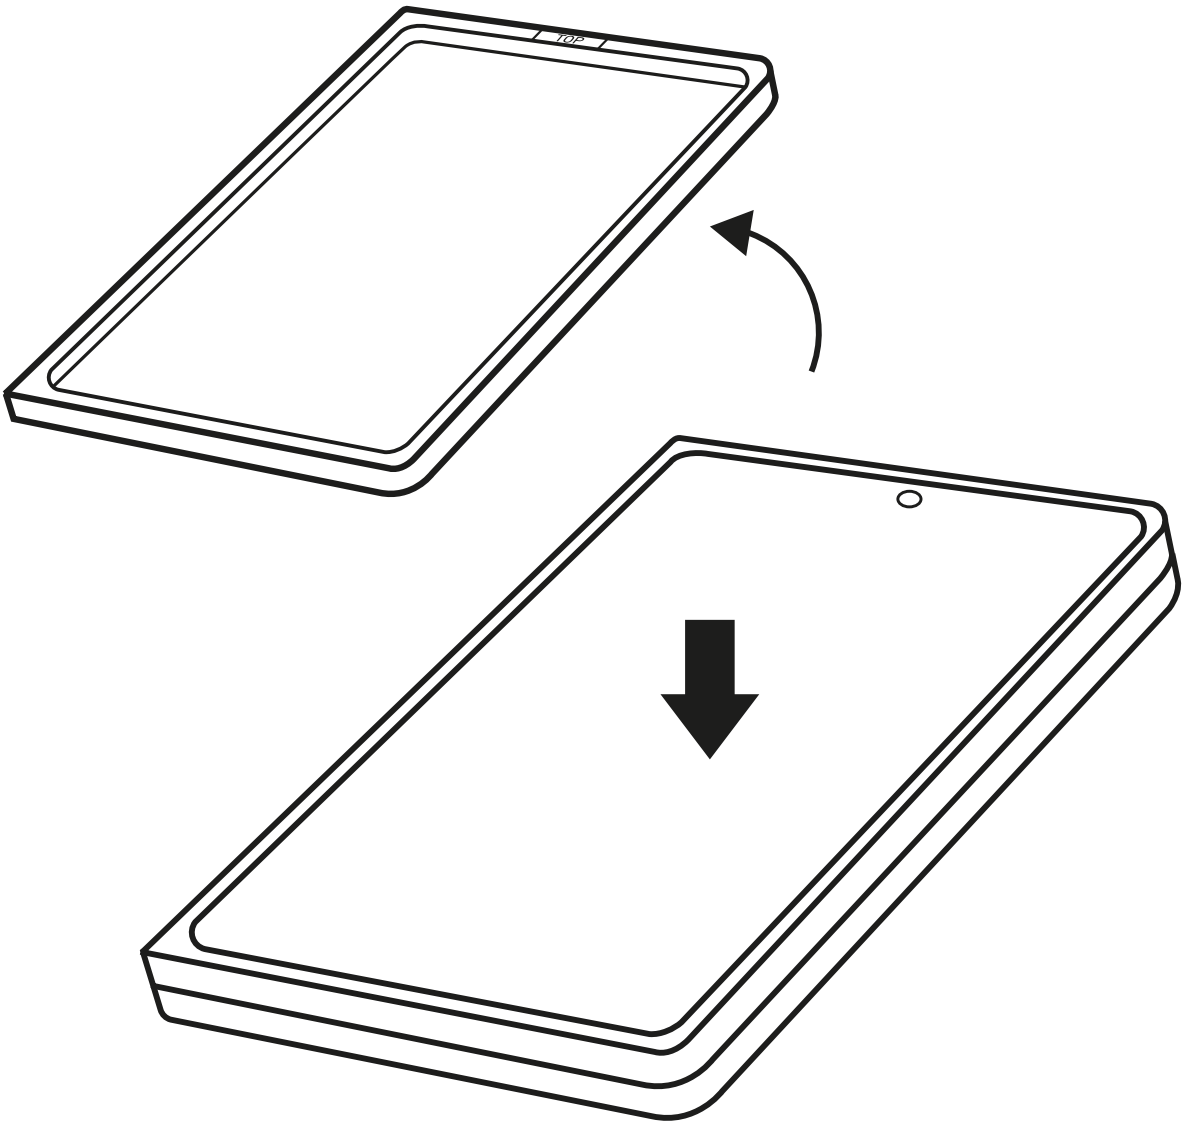

1 With the device closed, clean the outer screen with the wet wipe and then with the dry wipe.

A device chiuso, pulire lo schermo esterno con la salvietta umida e successivamente con quella asciutta.

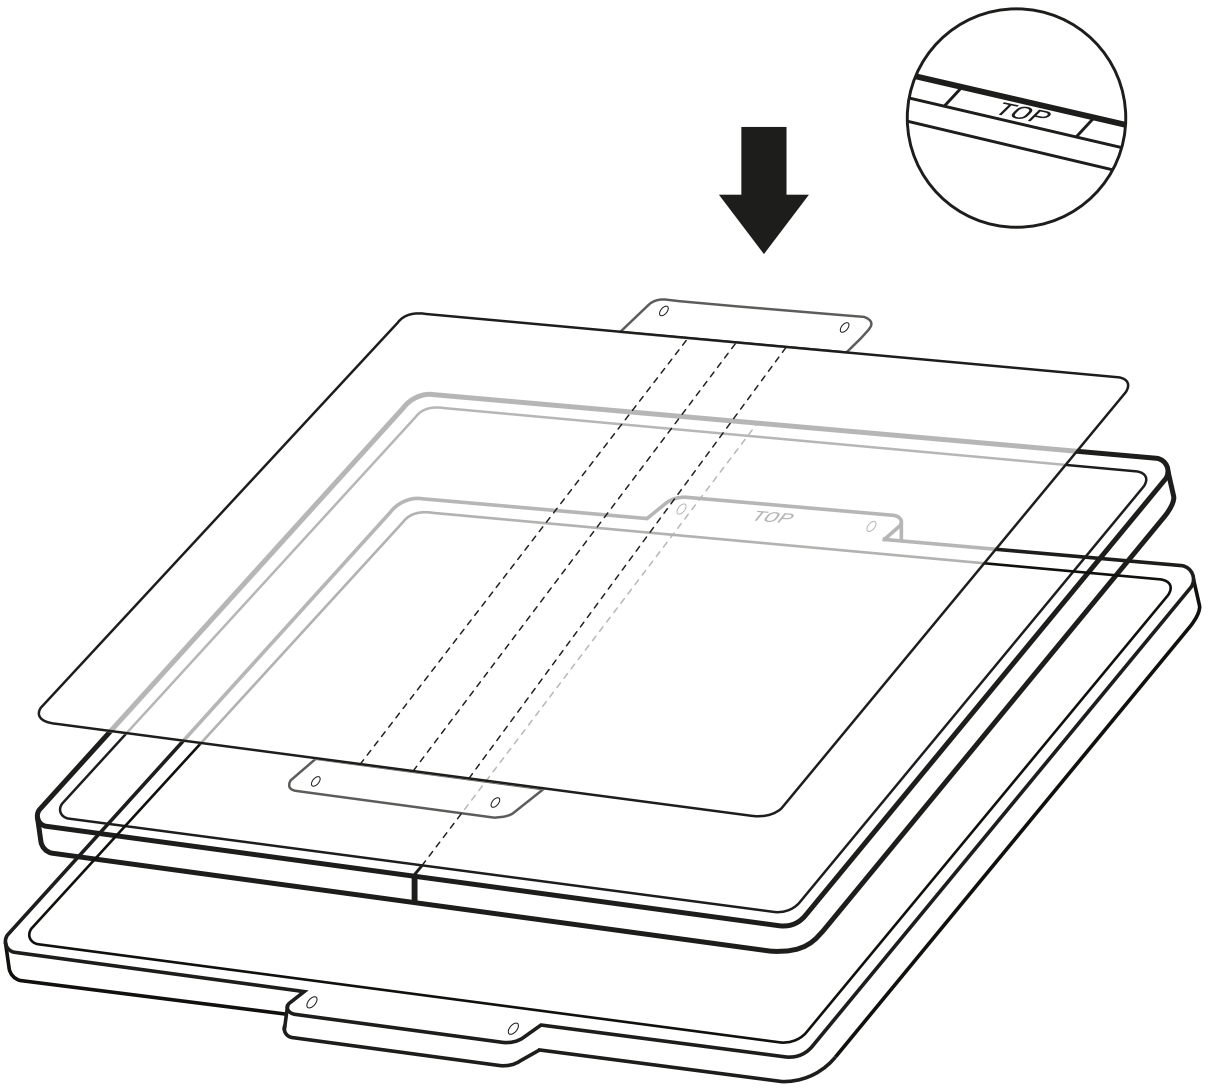

2 Position the applicator for the outer screen (with "TOP" positioned at the top), remove the protective film on the screen glass and position it inside the applicator at the outer screen.

Posizionare l'applicatore per lo schermo esterno (la scritta "TOP" posizionata in alto), rimuovere la pellicola protettiva sullo screenglass e posizionarlo all'interno dell'applicatore in corrispondenza dello schermo esterno.

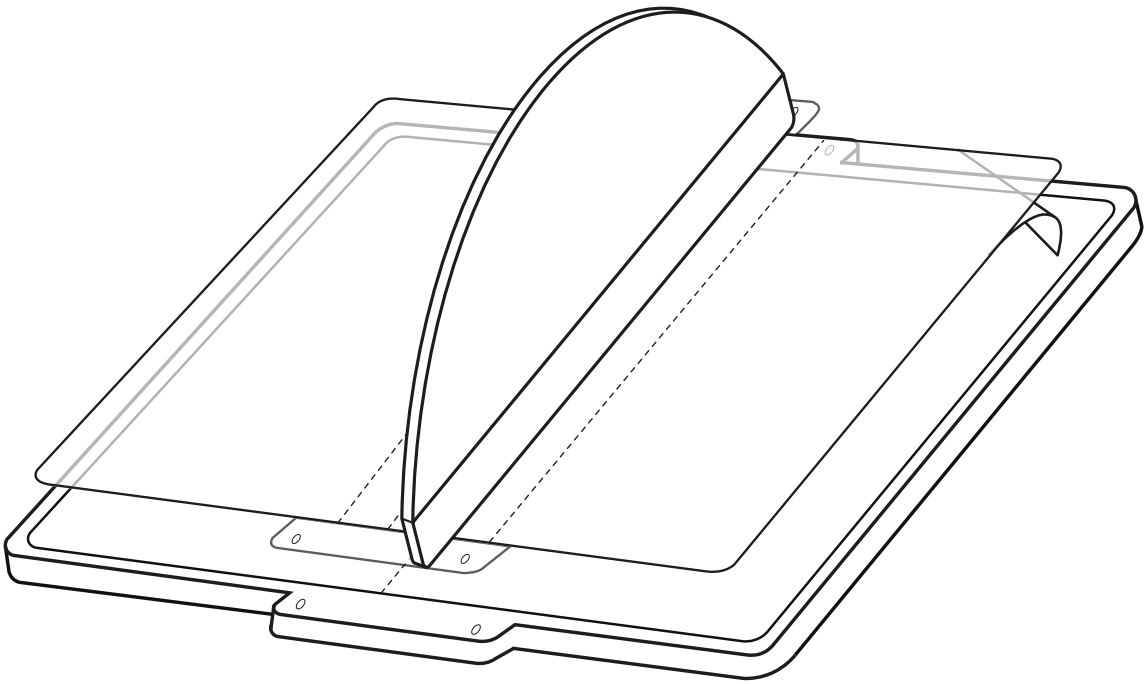

3 Press down while sliding your finger to ensure the screen protector adheres properly. While continuing to apply pressure, remove the applicator and, if necessary, use the included squeegee to press any remaining air bubbles toward the edges of the screen protector.

Premere, facendo scorrere il dito, in modo da poter far aderire lo screenglass. Continuando a premere sullo screenglass, rimuovere l'applicatore e far fuoriuscire eventuali bolle d'aria con l'utilizzo della spatola inclusa premendo verso l'esterno dello screenglass.

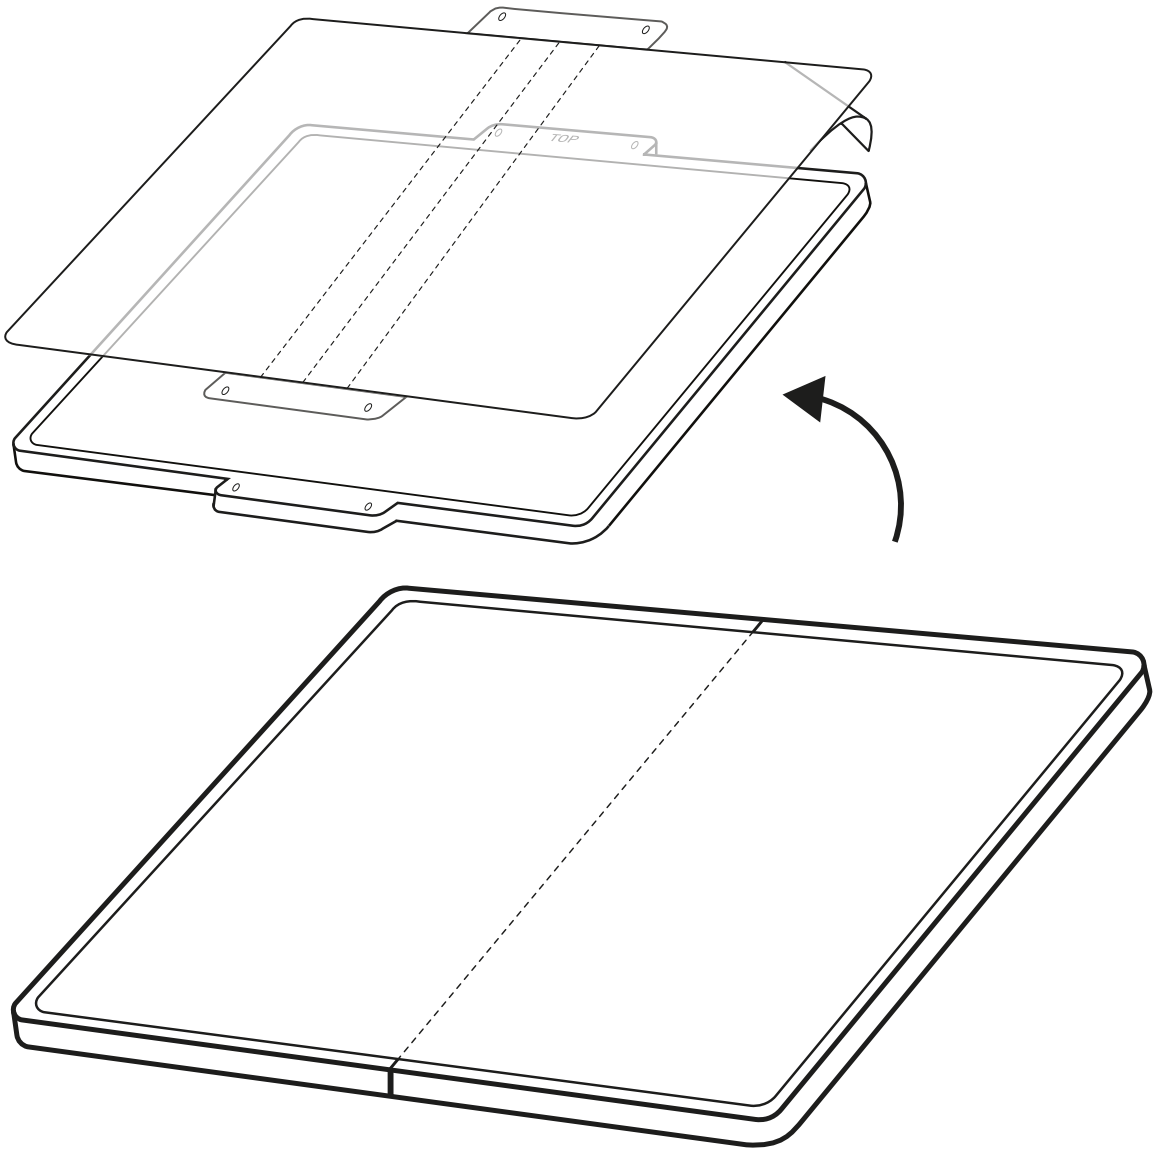

4 Position the opened device inside the applicator for the inner screen (with the "TOP" label facing upward). Position the film by aligning its four holes with the corresponding pins on the applicator.

Posizionare il dispositivo aperto nell'applicatore per lo schermo interno (la scritta "TOP" posizionata in alto). Posizionare la pellicola agganciando i quattro fori ai relativi perni dell'applicatore.

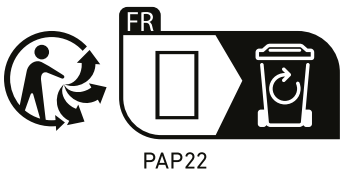

5 Place the squeegee on the blue line, lift the upper part of the film and press it down with the help of the squeegee; then do the same with the lower part of the film.

Posizionare la spatola sulla linea blu, alzare la parte superiore della pellicola e premere scorrendo verso l'alto, aiutandosi con la spatola; quindi effettuare la stessa operazione con la parte inferiore della pellicola.

6 Then remove the screen protector film and, if necessary, press out any remaining air bubbles toward the edges using the included squeegee.

Rimuovere quindi la pellicola protettiva dello screen protector ed eventualmente fare fuoriuscire le bolle d'aria rimaste premendo verso l'esterno utilizzando la spatola inclusa.
