Wireless headset with integrated LED lights

SKU: MHHEADLIGHPOPBTW

Turn on your music with multicoloured LED headphones

The multicoloured LED lights up the earcups and headband

The **Light Pop headphones** are original and make you stand out on any occasion. They have a **built-in LED** on the earcups and the headband that lights up your tracks with **striking coloured lighting**. Simply press the ON/OFF button when you want a unique atmosphere to accompany your favourite playlist, and if you want peace and quiet you can use them without lights.

Up to 20 consecutive hours of music and calls

Light Pops pair with your **smartphone, tablet or laptop without using wires**. After pairing for the first time they will automatically connect, giving you up to **20 hours of music**. When they are discharged, connect them to a power source with the included **USB-A - USB-C cable**: in 2 hours they will be 100% charged again. Thanks to the integrated **microphone** you can also **make calls**, record voice notes or interact with the voice assistant.

You can also connect them to a stereo or MP3 player thanks to the AUX port

If you have a **3.5mm jack** cable, you can also connect your headphones to an MP3 or stereo without a wireless connection; simply plug the cable into the socket next to the USB-C port.

Control your music directly from your headphones

The **keys** located on the earcup give you the option to control your music without touching the connected device. Leave your smartphone in your pocket while **controlling the volume** or **changing tracks** conveniently by clicking on the headphones.

Ultra-comfortable with padded, adjustable earcups

The earcups are easily adjustable to align perfectly with your ears. They are also very soft and pleasant on the ear, meaning you can **use them for a long time without problems**.
