OWS sports earphones with Air Conduction System and clip design

SKU: TEEARSPOWSCLIPK

Comfort and quality audio while on the move and in all weather conditions

SAFER LISTENING WHILE YOU WORK OUT

The **OWS Clip Go** earphones are designed for running, cycling, walking and everyday activities. The **Air Conduction System** transmits sound through the air without placing the earphones inside the ear canal, allowing you to enjoy music and other audio content while remaining aware of the sounds around you for greater safety during outdoor activities. You can also activate the **LED lights on the earphones** to make yourself more visible during evening workouts.

MAXIMUM COMFORT AND LIGHTNESS

The lightweight and stable **ear clip design** provides a precise and comfortable fit even during extended use. The earphones clip onto the outer ear, ensuring a secure hold that stays stable even while you are moving. Their ultra-lightweight construction also helps reduce pressure on the ears for maximum comfort.

IPX5 RATED

The **IPX5 rating** makes the earphones resistant to sweat and rain, making them ideal for workouts and outdoor activities. You can use them with confidence even when training in the rain.

INTEGRATED ENC MICROPHONE

The earphones feature an **integrated microphone with ENC technology**, which filters ambient noise to make your voice clearer and reduce external interference during video calls, meetings and everyday conversations.

TOUCH CONTROLS WITHOUT INTERRUPTING YOUR WORKOUT

The **touch controls** let you manage calls and music directly from the earphones without having to interrupt your workout or walk to reach for your device. With just a few taps, you can skip tracks, pause your music and manage calls. You can also activate the **voice assistant on iOS and Android** with a simple command.

EXTENDED BATTERY LIFE WITH THE CHARGING CASE

The earphones provide up to **5 hours of continuous playback** on a single charge and up to **25 hours of total battery life with the charging case**, which provides approximately four additional charges. When the earphones run out of battery, simply place them inside the case and they will be ready to use again in around **1.5 hours**.

KEY FEATURES

- Ultra-lightweight ear clip design: comfortable even during extended use with no pressure on the ears
- Air Conduction System: sound travels through the air without completely blocking ambient noise
- OWS technology: synchronised and immersive audio without placing the earphones inside the ear canal
- Ideal for sports and outdoor activities
- LED earphone lights: increased visibility during evening workouts
- Secure and stable fit even during physical activity
- IPX5 resistance to sweat and rain
- ENC microphone for clear calls
- Up to 25 hours of battery life with the charging case
- Charging time: 1.5 hours
