

AI TWS Earphones with app, translation, summaries and 28 hour battery life

SKU: TEEARTWSAIBTW

Speak, listen, translate, transcribe – all with a pair of smart earbuds.

AI-Driven Audio: the headset that thinks with you

Smart Buds earphones redefine the audio experience thanks to the **Integrated AI technology** and the powerful **SBS AI Connect** app. They capture, understand, transcribe and translate. SB offers **AI**.

Make or receive a voice recording wherever you go.

With the **Voice Recording** function, you can register **calls, live meetings or online/offline meetings** directly from the earphones via the dedicated app. Recording is continuous and designed to ensure you never miss an important word, even on the move.

Instant and accurate audio-to-text transcription

Any recorded conversation can be **automatically converted to text**. Whether it's meetings, lectures or brainstorming, the **transcription** function enables you to generate instant, accurate documentation, saving time and making it easier to share written content.

Automatic summary with visual Mind Map

Artificial intelligence creates an **automatic content summary**, highlighting key points from meetings or calls. The app also generates an **Interactive Mind Map**, dividing the main concepts into thematic nodes for a clear, structured and intuitive visual reading.

Two-way translation in over 50 languages

The **two-way translation** functions allows you to translate both the audio of conversations and transcribed texts **in real time**, in **over 50 languages**. A personal interpreter in your ears: useful when travelling, at work or during international calls. Interpreting takes place directly in the app and is produced in spoken and text form.

Up to 28 hours of battery life with fast charging

With **5.5 hours of continuous use per charge** and a case that extends the battery life to a total of **28 hours**, you can rely on these earphones for the whole day. A full charge takes just **1.5 hours** through the **USB-C port**, while intelligent standby mode extends efficiency when not in use.

Touch controls and stable wireless connectivity

Thanks to the **multifunction touch controls**, you can manage calls, the volume, music playback and voice assistant with one touch. The high efficiency **wireless connectivity** ensures a stable connection up to 10 metres away, with fast and reliable pairing with all Android (6+) and iOS (13+) devices.

TWS Earphones with AI: 120 free minutes and flexible packages with up to 1,800 minutes

The TWS earphones with artificial intelligence integrate the SBS AI app, which offers **up to 120 free minutes** of speech transcription, machine translation, a summary feature and mind mapping. Once the free minutes have run out, you can continue to use the service

through monthly subscriptions or pay-as-you-go packages that are **valid for up to 12 months**. The use of minutes is flexible and manageable over time, ensuring a personalised and continuous experience.

To download the app from **Google Play Store**, click [here](#).
To download the app from the **Apple Store**, click [here](#).

Microphone with ENC technology

The TWS earbuds feature a microphone with **Environmental Noise Cancellation (ENC)**, capable of **filtering external noise** and delivering a **clear and crisp voice** during calls and video conferences. Thanks to this technology, every conversation is **clean and professional**, even in noisy environments.
