

TWS earphones with 250 mAh charging case

SKU: TEEARTWSAIRKABK

Listen to music and make calls all day long in comfort

No need for wires, thanks to True Wireless Stereo (TWS) technology

The **Air Kab wireless earphones** connect to your **smartphone, tablet or laptop** without the need for any wires. They feature **Hall Switch Technology**, so the headset **connects** to the already-paired device **as soon as the case is opened**. The **True Wireless Stereo (TWS)** technology also ensures a **stable connection between the two earphones**, even **10 metres away** from the device.

The case allows up to 4 recharges, wherever you are

The case **protects** the earphones from bumps and scratches, but also had a very important charging function. **If your earphones are discharged**, in fact, you will not need to connect them to a charger or a powerbank; **simply place them in the case** to have them fully charged again **in 1½ hours**. The case has power for 4 charges, so you can enjoy **music and calls all day long**. They have an autonomy of **5 consecutive hours**: you can use them all morning, recharge them during lunch, and use for the rest of the day, without difficulty. In the evening, meantime, you can power the case for the next day, using the **USB-A - USB-C cable** (included).

There is a built-in microphone for calls

In addition to listening to music, during calls you can talk directly from the headset, thanks to the integrated microphone. You can **also record voice messages** on messaging apps or **interact with a voice assistant**.

Touch buttons on the earpieces give you control over music and calls

Air Kabs are also exceptional when it comes to comfort. The touch controls mean you can **play/pause a track, change song, reply/end/refuse a call** and **activate a voice assistant**. All this directly from the earphones, without having to pick up your smartphone.
