

Nexa AI TWS Earbuds with Artificial Intelligence for Summaries, Recording and Real-Time Translation

SKU: TEEARTWSMAIBTW

Much more than simple earbuds: translate, record, transcribe and enjoy your music

MORE THAN JUST MUSIC: DISCOVER THE SMART ASSISTANT ALWAYS WITHIN REACH

The **Nexa AI TWS earbuds** combine wireless freedom, premium sound quality, and advanced **artificial intelligence** features. These earbuds integrate AI technology that allows you to record, transcribe, and translate in real time. Designed to make every conversation smoother and easier to understand, they help you work smarter while still delivering a high-quality listening experience.

A WORLD OF POSSIBILITIES WITH THE SBS AI CONNECT APP

The purchase of Nexa AI earbuds guarantees unlimited free access to the SBS AI Connect app: once you purchase the Nexa AI earbuds, access the app to unlock smart features such as **audio-to-text transcription**, **voice recording**, **real-time bidirectional translation**, and AI-generated **summaries** with visual Mind Maps.

To download the app from the **Google Play Store**, click [here](#).
To download the app from the **Apple App Store**, click [here](#).

COMMUNICATE WITHOUT LIMITS

Thanks to the **bidirectional translation** feature, you can translate conversations, calls, and even written texts in real time in **more than 50 languages**. Translations are managed directly through the app in written or audio format, ensuring maximum flexibility and usability. These earbuds are therefore ideal for travel, business meetings, calls, and international conversations, giving you direct access to your own smart personal interpreter.

NEVER MISS A WORD AGAIN

Through the app's Voice Recording function, Nexa AI earbuds can be used to **record calls, meetings, and university lectures**, making sure you never miss important information, even while on the move.

ACCURATE TRANSCRIPTION

Every recorded file can be **converted into text**: transcribe business meetings or automatically create accurate notes from lessons and lectures. Save time and simplify information sharing.

CREATE INTERACTIVE MIND MAPS

The AI summary feature automatically generates **smart summaries** of conversations and meetings, highlighting key points. In addition, the app creates an **interactive visual Mind Map**, organizing information into main topics for immediate and intuitive understanding.

ADVANCED AUDIO EXPERIENCE

The **Active Noise Cancelling** technology helps reduce background noise for a more immersive listening experience. Choose between three listening modes: standard mode, ambient noise filtering, or complete noise cancellation to focus entirely on your music. The **ENC microphone** ensures professional-quality audio by filtering external noise and improving voice clarity during calls.

INTUITIVE CONTROLS AND COMPLETE FREEDOM OF MOVEMENT

These earbuds offer up to **5.5 hours** of continuous playback and up to **25 hours** total battery life with the charging case; once that the earbuds' battery has run out, they can be recharged by placing them in the charging case and they will be ready to use again in just **1.5 hours**; the case can be charged via **USB-C**.

Thanks to the touch controls, you can manage music, calls, and activate your voice assistant directly from the earbuds, without taking out your device. In addition, the **10-metre wireless range** guarantees maximum freedom of movement without compromising connection quality.

KEY FEATURES

- TWS earbuds with integrated artificial intelligence
- Unlimited access to the SBS AI Connect app
- Voice recording ideal for lectures, meetings, and calls
- Bidirectional translation in over 50 languages
- AI-generated summaries and interactive Mind Maps
