

TWS headphones with multifunctional display and Active Noise Cancelling (ANC) technology

SKU: TEEARTWSMOODBTK

Much more than a pair of headphones

ANC technology lets you fully immerse yourself in your music

The **Mood earphones** are exactly what you're looking for if you want an unparalleled audio experience. They're totally **wireless**: you connect them to one **smartphone, tablet or laptop** wire-free. The **True Wireless Stereo (TWS) technology** allows the two headphones to sync perfectly. The **Active Noise Cancelling (ANC) technology** furthermore **reduces external noise**, ensuring you're fully immersed in your music, films or videos.

The touch LCD display offers many amazing features

They stand out for the touch LCD display on the case. Choose between the **various modes** simply by swiping them across the screen. You'll be able to **take photos, set a wallpaper, change the sound equaliser, set an alarm and much more**. You'll also be able to **find a lost headphone**: using the reference mode, tap the headphone you want to find and it will make a sound. In addition to **managing tracks** and the **volume**, you'll be able to activate/deactivate the **ANC** or choose the **transparency mode** to be able to hear external noises more.

Simply place them in the case to charge, no wires needed

There **380mAh case** not only protects your headphones, but also charges them. Insert them inside and charging will start **automatically** without the need for any wire. This way, you can easily power them **even when you're away from home**, as well as **extending the** headphone battery life which lasts many hours. When the base is also out of power, connect it to a charger or power bank using the included USB-A - USB-C cable.

Touch controls on the headphones

The Moods have dedicated controls for managing music and calls. With a few taps you can **pause/play a song, change tracks, control the volume, answer/end/reject a call** and even **activate the voice assistant**. You can also turn the **ANC** on/off, choose the **transparency mode** or activate the **gaming mode** to amplify the bass and enjoy an immersive experience in your favourite video games.
