

Sports ear-hook earphones with Active Noise Cancelling (ANC) technology

SKU: TEEARTWSRHINOBTK

Air Conduction System earphones perfect for running and sports

Extremely stable with high-performance

The **Rhino Twin earphones** are designed to give you maximum comfort when you run and play **sports**. They have some **integrated hooks** that wrap around the ear and hold them in place. Use them for a long time: you can get up to **7 hours of continuous playback** and with the **500mAh charger** you can get up to **35 hours**. Connect them in **wireless** mode to your Samsung, Apple iPhone, Xiaomi, Oppo, Google Pixel or other brands of smartphone and use them **even 10 metres away**: ideal for training and fitness. The built-in **microphone** also allows you to talk to callers without using the phone.

You don't have to put them into the ears

Their unique design and **Air Conduction System technology** allow you to enjoy music without inserting them into your ear canal. This ensures that there is no discomfort when you move around and that there is an **excellent balance** between the **audio** reproduced and the **environment** surrounding you. But if you find it more comfortable to keep them in your ear, you can attach the **Semi In-Ear Tips** supplied.

Technology

They feature **Open Wireless Stereo (OWS)** technology, which means that the connection between the earphones is completely wireless, ensuring a very stable connection at all times. With **Active Noise Cancelling (ANC) technology**, you get **maximum isolation from external noise** when you want to lose yourself in your playlist. If, on the other hand, you are running around town and want to **hear external noise better**, switch to **Transparency mode**. Lastly, **Environmental Noise Cancellation (ENC)** technology allows the caller to **clearly hear your voice**, even in places that aren't perfectly quiet. The Rhino Twin are the ultimate earphones.

Touch control

The **earphones** have buttons that allow you to manage music and calls with a simple touch. You do not need to use the connected device. You can **change tracks**, **play/pause music**, **answer/end a call**, **enable ANC/Transparency** and even **use the Google iOs voice assistant**.

Key features:

- Open Wireless Stereo (OWS)
- Wireless range: 10 metres
- Integrated ear hooks

- Air Conduction System
- Active Noise Cancelling (ANC) Technology
- Built-in microphone
- Environmental Noise Cancellation (ENC) Technology
