

TSA Lock with Tracker and Dual Compatibility Apple Find My and Google Find Hub, Ideal for Suitcases

SKU: TEFINDLOCKAPGO

Protect and track your luggage with a single accessory

TSA LOCK WITH TRACKER FOR SAFER TRAVEL

Track Lock combines the protection of a **luggage lock** with the convenience of an **integrated tracker**. It is designed for travellers who want to secure their luggage, identify it more easily and track or locate it directly from their smartphone. Its compact design allows it to be attached to trolley suitcases, luggage and travel bags without adding bulk.

DUAL COMPATIBILITY WITH APPLE FIND MY AND GOOGLE FIND HUB

This TSA luggage lock with tracker works with both **Apple Find My** and **Google Find Hub**, offering a versatile solution for both iPhone and Android users.

You can locate your luggage and activate the integrated **60 dB sound alarm** to easily identify it when nearby, whether at the airport, hotel or train station. Thanks to the **20-metre connectivity range**, everything that matters stays under control.

COMBINATION LOCK AND USB-C CHARGING

The lock features a **combination locking system** for greater security without the need for keys; it is also TSA approved, meaning airport security authorities can open and close it without damaging it. The lock charges via **USB-C cable**, while its lightweight design of just **41 g** and compact dimensions of **45 x 43 x 14 mm** make it minimal, practical and ideal for frequent travel use.
