Wireless adapter with USB and 3.5 mm jack cable

SKU: TERXTXBTK

Connect your smartphone or headset wirelessly even to devices that don't allow wireless connection

ADAPTER

The **Wireless Adapter** is designed **to allow your devices** such as TWS headphones or earbuds, a smartphone or tablet from Samsung, Apple, Huawei, Oppo, Xiaomi and other brands **to connect to devices that do not have a wireless connection**such as a car radio, hi-fi system, desktop PC or TV.

The **operating range of 10 metres** ensures operation even at a distance.

TRANSMISSION MODE

On top of the adapter, you will find a button that allows you to choose between **two modes: transmit or receive**. The **first mode** is designed for when you want to listen to the sound of a film from your TV on your earphones or speaker, for example. **The adapter will transmit the signal** from your TV to your reference devices.

RECEPTION MODE

The second mode is perfect for when you want to play music and videos on a stereo or radio from your smartphone or tablet. **The adapter**, in this case, **will receive the signal** from your devices to play it on the stereo.

WITH USB...

The connector allows the adapter to be easily plugged into the USB port of a **laptop, PC, car radio or HI-FI system with a flash drive port.**

OR WITH 3.5 MM JACK

If your device is only equipped with a 3.5 mm jack input you can **connect the supplied jack cable to the back of the adapter.** Insert the connector into the hole corresponding to the mode you want to use, indicated by the blue (transmit) or red (receive) light. The adapter will still need to be connected to a power source with a USB port in order to transmit or receive the signal.
