

Go Life Watch HR

SKU: TSPORTGOLIFEWATCHHR

Heart rate, touch display, pedometer, calorie counter, sleep monitoring and music control

Monitoring **daily physical activity** has never been so sophisticated: **Go Life Watch HR** records steps, distance travelled, calories burned, duration of your physical activity and heart rate. There is **touch display**, allowing you to always check the current time and date.

In addition to recording daily physical activity, Go Life Watch HR can also monitor **sleep quality** by making a distinction between light sleep and deep sleep.

The data that this fitness tracker records during the day can be viewed on your smartphone: synchronized with the **free Go Life app**, it then allows you to track daily progress and analyze the records.

Go Life Watch HR also lets you set **silent alarms** and **control music playback**.

If you want, you can also receive **notifications** of incoming calls and incoming messages to your smartphone directly on your wristband.

Go Life Watch HR comes with a **built-in USB connector** for charging: after running down the charge, simply disconnect the strap and connect the fitness tracker directly to a PC or any charger with a USB port. This procedure also allows the product to be turned on if it has switched off.

Go Life Watch HR uses the **free Go Life application** developed by SBS for those who love sports and want to track their daily goals. Downloadable for free from the [Apple App Store](#) and the [Google Play Store](#), the app allows you to connect all the **Go Life range** of devices, including various fitness trackers, jump ropes, weights, body composition scales, nutritional scales, and cadence meters for bikes.
