

Holder compatible with Magsafe Sticky

SKU: TESUPPMAGSTICKYG

Fix your phone to any smooth surface and use the strap for a secure hold

Attaches to your smartphone with the MagSafe magnet

This **smartphone holder** combines two intelligent fixing systems: on the one hand it is equipped with a **suction pad** to adhere to smooth and flat surfaces, on the other hand an **integrated MagSafe compatible magnet** which attaches firmly to the **iPhone** or to other **smartphone with MagSafe cover**. In this way, your mobile phone will remain stable wherever you are, whenever you need to be hands-free. What's more, you can remove it and position it whenever you want. **Before using it, clean the suction pads** to ensure optimal grip to the surface in question at all times.

For hands-free selfies, videos and make-up

If you're about to go out and want to give your make-up one last check, just **attach the holder to a smooth surface** and use the front camera as a mirror. With the **MagSafe magnet**, the phone remains stable, even during a **video call, recording content for social media** or a **group shot**. No more wobbly phones: the holder grips your smartphone firmly just where you want it.

Can be used as a mirror, for taking selfies and more

The suction pad holder can help you in many inconvenient situations. If you have an important appointment and want to check your make-up one last time but don't have a mirror available, you can attach your smartphone to a smooth wall and use the front camera. Taking a group photo with your friends becomes child's play: just fix the phone to a mirror or other smooth flat surface and activate the self-timer on the device. You can also do a video call or shoot a video for social media in comfort, even if you don't have a dedicated holder with you.

With integrated safety strap

Thanks to the **integrated strap**, you can always hold your phone in your hand in complete safety, even during **video in motion** or while you take a **perfect selfie** on the road. It's the ideal accessory for people who create content or simply want a more secure grip, avoiding accidental drops.

KEY FEATURES:
