

Air Space Multipoint TWS Earphones with ANC and Touch Controls

SKU: TETWSAIRSPACEBTW

Your perfect sound space, wherever you are.

The **Air Space TWS** earphones are designed to offer you an advanced listening experience, with the perfect blend of comfort, technology and impressive audio performance. Discover every detail that makes them the ideal companion for your everyday life.

Active Noise Cancellation (ANC)

Thanks to **Active Noise Cancelling** technology, the Air Space earphones detect unwanted ambient sounds and actively cancel them out using reverse sound waves. The result? Clear, distraction-free audio, perfect for listening to music or taking calls, even in noisy environments like public transport or the office.

Multipoint Connection: double flexibility

With the **Multipoint** function, you can connect two devices with wireless connectivity at the same time, such as your smartphone and your laptop. Seamlessly switch between a phone call and a Zoom meeting without having to disconnect and reconnect each time.

Transparency mode: listen to your surroundings

When you need to stay connected to the outside world – crossing the street, talking to someone or simply staying alert – activate the **Transparency** function. This mode lets amplified ambient sounds pass through naturally, so you can stay aware of your surroundings without removing your earphones.

Total control at your fingertips

The **touch controls** allow you to manage playback, answer or end a call, and even activate your smartphone's **voice assistant** with a simple touch. All without having to take your phone out of your pocket.

All-day battery life

The earphones offer **four hours of continuous playback** on a single charge, and they fully recharge in just **one hour**. The **charging case**, when fully charged, guarantees up to **24 hours of total use**, keeping you connected from morning to night, even on the go.

Wireless freedom

With an operating range of **10 metres**, you can move freely without losing connection. Whether you're working from home or taking a walk, the **Air Space** earphones can come with you everywhere.

Key features:

- Active Noise Cancelling for immersive audio quality
- iOS and Android compatibility
- Multipoint connection: connect two devices simultaneously
- Touch controls and voice assistant activation
- Transparency mode to listen to your surroundings
- 4 hours of playback
- The charging case guarantees 24 hours of playback
- 1 hour to fully charge the earphones
- Operating distance: 10 metres from the audio source
