# UV steriliser with 5W wireless charging

SKU: TEUVSTER5W

## Ultraviolet steriliser with 254nm wavelength, 5 Watt wireless charging for Qi-compatible smartphones

**2in1 ACCESSORY: A SINGLE SOLUTION**

Charging and hygiene go hand in hand. With the ***UV steriliser*** you can reduce the presence of germs, spores and bacteria on your accessories or personal possessions, or **wirelessly power** your smartphone.

**STERILISATION: WHY IT'S FUNDAMENTAL**

Every day you use devices such as smartphones, headphones, charging cables and smart watches, or objects such as keyrings, wallets, cutlery, glasses, rings and bracelets. The steriliser is therefore an effective ally for the **best sanitisation of your accessories**.

The sterilisation is based on the use of a lamp that emits **ultraviolet rays** at a given **wavelength** expressed in nanometres. The lower this parameter, the more effective the action. To achieve significant sanitation - reducing germs, spores and bacteria that lurk on surfaces - it is estimated that the wavelength of UV rays must be below 280 nanometres. On the steriliser this figure is around **254nm**.

**STERILISATION: EASY FOR EVERYONE**

Connect the steriliser to a power source using the charging cable. You will need to insert your device into the dedicated compartment, close the lid and use the button to select the **sterilisation mode** instead of wireless charging. After about 10 minutes, the device will emit an acoustic signal to indicate that the operation has been completed.

**AN ADDITIONAL BENEFIT: WIRELESS CHARGING**

To take advantage of the wireless charging provided by the steriliser, your smartphone must be **compatible with Qi technology**. This protocol enables your device to recharge using the right amount of power and no wires.

The steriliser must be connected to a power source using the cable included in the package. Using the start button, you can choose **the wireless charging mode** instead of the sterilisation action.

Place your smartphone on top of the cover: power will flow immediately. The power reaches **5W**: in 30 minutes, your device's charge level will be 25%.

**FEATURES:**

- Technology: UV lamp
- Wavelength: 254nm

- UV power: 2w
- Operating time: 10 minutes for sterilisation
- Sterilisation area: 160 x 95 x 13mm
- Wireless charger: 5W Standard
- Smartphone charge level after 30 minutes: 25%*

*times are approximate and depend on the device recharged.

UV steriliser with 5W wireless charging
SKU: TEUVSTER5W

# Technical data

EAN: 8018417304347
SKU: TEUVSTER5W
GPSR: The product must not be used by children or by people unable to understand the potential risks., Item subject to WEEE Directive 2012/19/EU, Item subject to CE marking, Packaging of the item subject to the "Green Dot" recycling system, The item packaging is recyclable, Item subject to UKCA marking
Color: white
Weight: 431 g
: 8543709099
UV power: 2 W
Wavelength: 253.7 nm
Wireless Output: 5W
Sterilization area: 160*95*13 mm
