Instructions for use

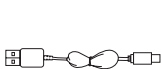

Mini compressore

Display e riepilogo funzioni

Accessori forniti

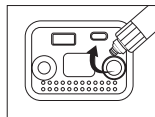

Cavetto di ricarica
USB-Type C

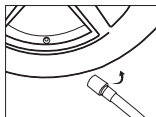

Aghi di varie tipologie

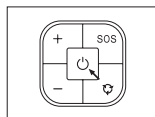

Istruzioni per l'uso

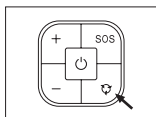

1. Per prima cosa avvitare il tubo fornito, l'estremità arancio nel foro arancio.

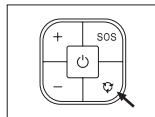

2. Collegare l'altro lato del tubo alla valvola dello pneumatico.

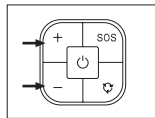

3. Premere alcuni secondi il tasto per accendere il dispositivo.

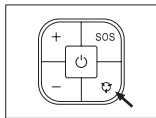

4. Tenere premuto per scegliere tra le unità di misura disponibili (psi, bar, kPa, kg/cm²).

5. Premere ripetutamente per individuare la modalità desiderata (tra auto, moto, bici, palloni, personalizzato).

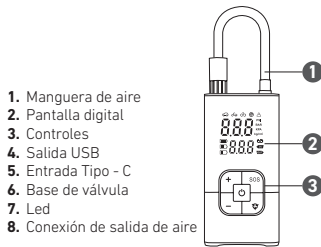

6. Premere + oppure - per modificare la pressione inserita.

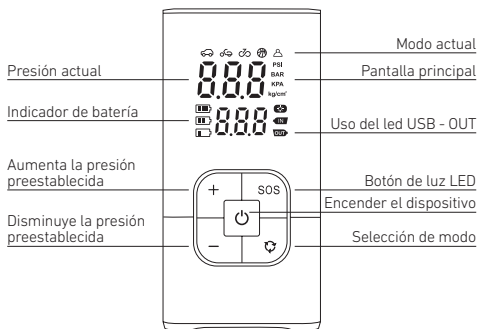

7. Infine, premere il tasto per far partire il gonfiaggio: si fermerà automaticamente appena raggiunta la pressione preimpostata.

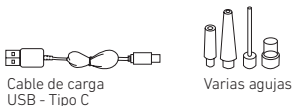

Mini compresor

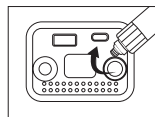

Pantalla y resumen de funciones

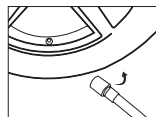

Accesorios suministrados

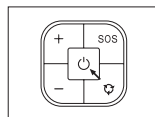

Instrucciones para el uso

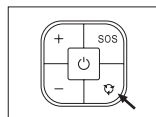

1. En primer lugar, enrosca el tubo suministrado, el extremo naranja en el orificio naranja.

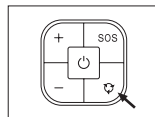

2. Conecta el otro lado de la manguera a la válvula del neumático.

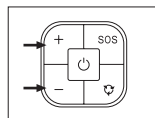

3. Pulsa el botón durante unos segundos para encender el aparato.

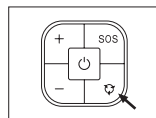

4. Mantén pulsado para elegir entre las unidades disponibles (psi, bar, kPa, kg/cm²).

5. Pulsa repetidamente para localizar el modo deseado (entre coche, moto, globo, personalizado).

6. Pulsa + oppure - para cambiar la presión introducida.

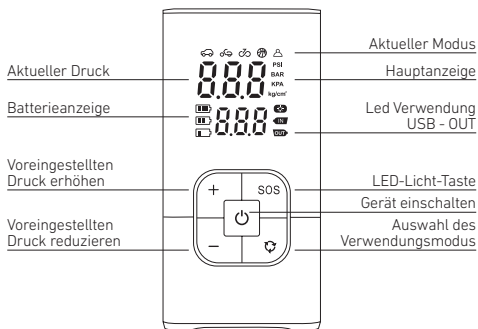

7. Por último, pulsa el botón para iniciar el inflado: se detendrá automáticamente en cuanto se alcance la presión preestablecida.

Acessórios fornecidos

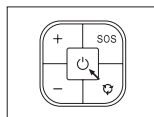

Instruções de uso

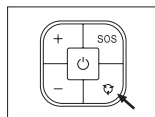

1. Primeiro, enrosque o tubo fornecido, com a extremidade laranja, no orifício laranja.

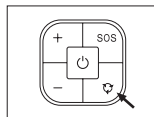

2. Ligue o outro lado do tubo à válvula do pneu.

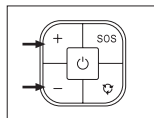

3. Prima o botão durante alguns segundos para ligar o aparelho.

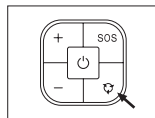

4. Prima e mantenha premido para escolher entre as unidades disponíveis (psi, bar, kPa, kg/cm²).

5. Prima repetidamente para localizar o modo pretendido (entre carro, bicicleta, balões, personalizado).

6. Prima + ou - para alterar a pressão introduzida.

7. Por fim, prima o botão para começar a insuflação: esta para automaticamente assim que a pressão predefinida for atingida.

Мини-компрессор

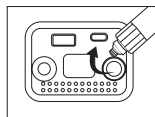

Дисплей и краткое описание функций

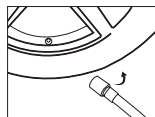

Приспособления в комплекте

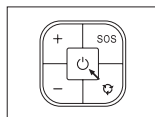

Инструкция по эксплуатации

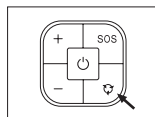

1. Сначала закрепите приложенный в комплекте шланг. Оранжевый конец крепится в оранжевое отверстие.

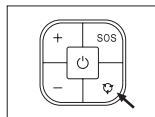

2. Подсоедините другой конец шланга к вентилю шины.

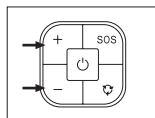

3. Нажмите и удерживайте нажатой в течение нескольких секунд кнопку чтобы включить устройство.

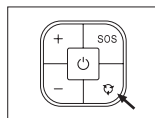

4. Нажмите и удерживайте нажатой кнопку чтобы выбрать одну из имеющихся единиц измерения (psi, bar, kPa, kg/cm²).

5. Нажмите несколько раз кнопку чтобы выбрать нужный режим (автомобиль, велосипед, воздушный шар, индивидуальный).

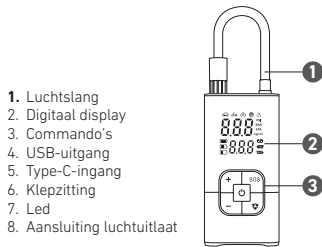

6. Нажмите "+" или "-", чтобы изменить значение введенного давления.

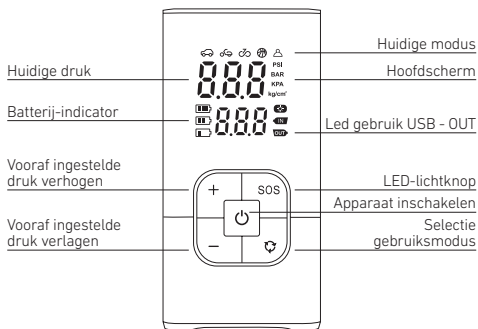

7. Наконец, нажмите кнопку чтобы началось накачивание, которое прекратится автоматически после достижения заданного значения давления.

Akcesoria w zestawie

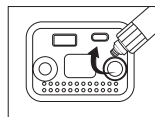

Kabel USB do ładowania - typ C

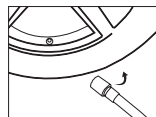

Różnego rodzaju igły

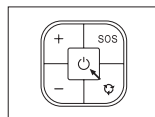

Instrukcja użycia

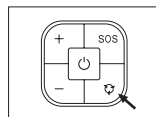

1. Najpierw wkręć dostarczony wąż pomarańczowym końcem w pomarańczowy otwór.

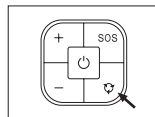

2. Podłącz drugi koniec węża do zaworu opony.

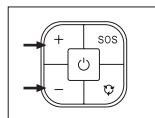

3. Aby włączyć urządzenie, należy wcisnąć przycisk i przytrzymać go przez kilka sekund.

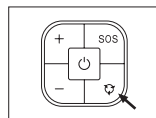

4. Naciśnij i przytrzymaj aby wybrać jedną z dostępnych jednostek (psi, bar, kPa, kg/cm²).

5. Naciśnij kilkakrotnie przycisk aby wybrać żądany tryb (samochód, motor, rower, balon, niestandardowy).

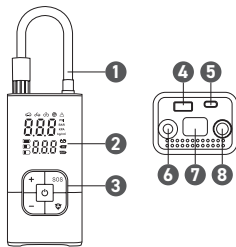

6. Naciśnij + lub -, aby zmienić wprowadzone ciśnienie.

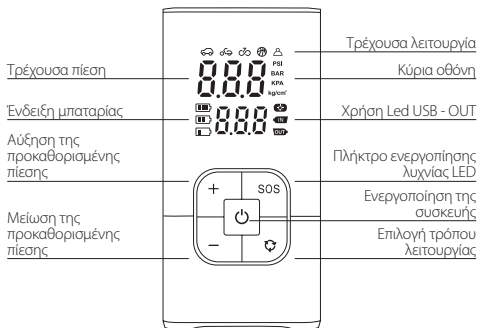

7. Na koniec naciśnij przycisk aby rozpocząć pompowanie: zatrzyma się ono automatycznie po osiągnięciu ustawionego ciśnienia. preimpostata.

Μίνι συμπιεστής

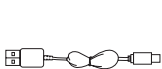

1. Εύκαμπτος σωλήνας αέρα
2. Ψηφιακή οθόνη
3. Λειτουργίες
4. Θύρα USB
5. Θύρα Τύπου C
6. Θέση βαλβίδας
7. ΛΥΧΝΙΑ LED
8. Συνδεση έξοδος αέρα

Οθόνη και σύντομη λειτουργίες

Παρεχόμενα αξεσουάρ

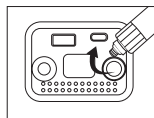

Καλώδιο φόρτισης
USB - Τύπος C

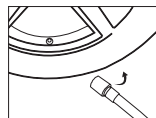

Βελόνες διαφόρων
τύπων

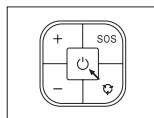

Οδηγίες χρήσης

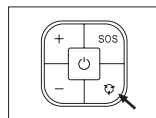

1. Αρχικά βιδώστε τον παρεχόμενο σωλήνα, το πορτοκαλί άκρο του στην πορτοκαλί οπή.

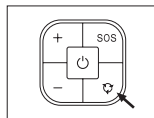

2. Συνδέστε το άλλο άκρο του σωλήνα στη βαλβίδα του ελαστικού.

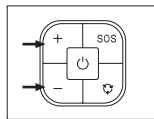

3. Πιέστε το κουμπί για μερικά δευτερόλεπτα για να ενεργοποιήσετε τη συσκευή.

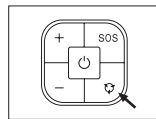

4. Πιέστε παρατεταμένα για να επιλέξετε από τις διαθέσιμες μονάδες μέτρησης (psi, bar, kPa, kg/cm²).

5. Πιέστε επανειλημμένα για να εντοπίσετε την επιθυμητή λειτουργία (για αυτοκίνητο, ποδήλατο, μπάλες, προσαρμοσμένη).

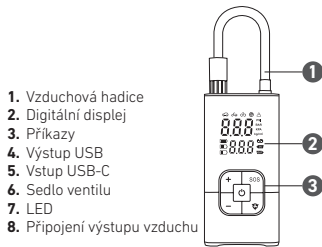

6. Πιέστε + ή - για να αλλάξετε την εισαγόμενη πίεση.

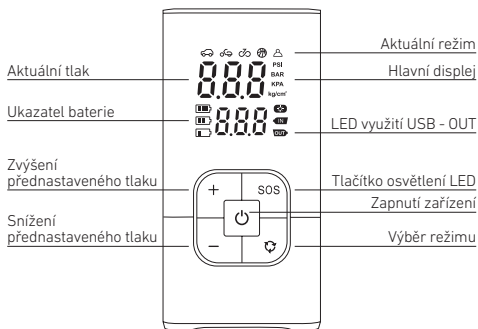

7. Τέλος, πιέστε το κουμπί για να ξεκινήσει το φούσκωμα: θα σταματήσει αυτόματα μόλις επιτευχθεί η προκαθορισμένη πίεση.

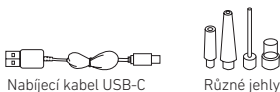

Mini kompresor

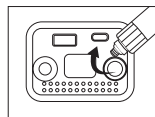

Displej a souhrn funkcí

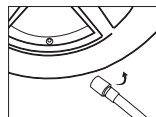

Dodávané příslušenství

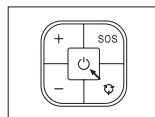

Pokyny k použití

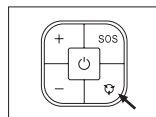

1. Nejprve našroubujte dodanou trubičku oranžovým koncem do oranžového otvoru.

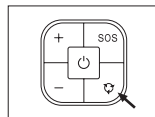

2. Připojte druhou stranu hadice k ventilu pneumatiky.

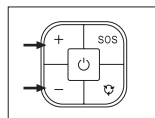

3. Podržením tlačítka na několik sekund zařízení zapnete.

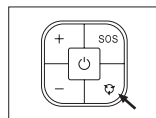

4. Podržením tlačítka zvolíte jednu z dostupných jednotek (psi, bar, kPa, kg/cm²).

5. Opakovaným stisknutím tlačítka zvolte požadovaný režim (mezi auto, kolo, balón, vlastní).

6. Zadaný tlak změníte stisknutím tlačítka nebo .

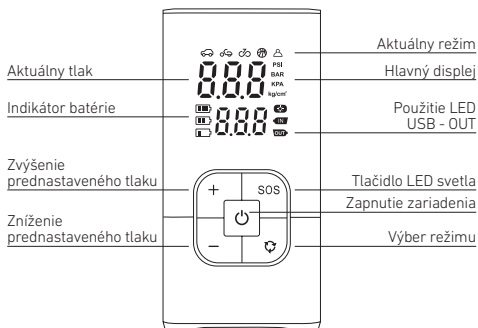

7. Nakonec stisknutím tlačítka spustíte nafukování: to se automaticky zastaví, jakmile je dosaženo nastaveného tlaku.

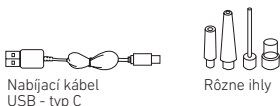

Mini kompresor

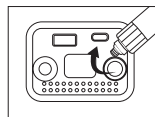

Displej a prehľad funkcií

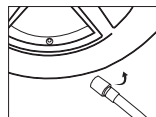

Dodávané príslušenstvo

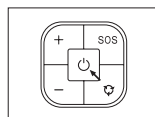

Návod na používanie

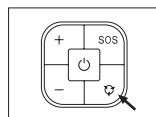

1. Najprv zaskrutkujte dodanú trubicu, oranžový koniec do oranžového otvoru.

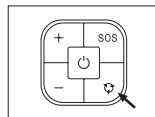

2. Druhú stranu hadice pripojte k ventilu pneumatiky.

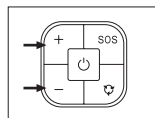

3. Stlačením tlačidla na niekoľko sekúnd zapnete zariadenie.

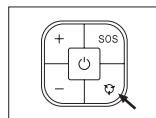

4. Stlačením a podržaním tlačidla vyberte jednu z dostupných jednotiek (psi, bar, kPa, kg/cm²).

5. Opakovaným stláčaním vyhládajte požadovaný režim (medzi autami, motorkami, bicyklami, lietadlami, personalizované).

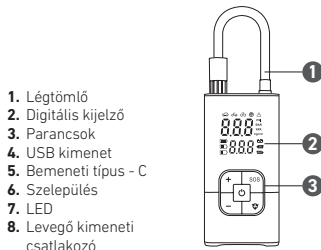

6. Stlačením tlačidla + alebo - zmeníte zadaný tlak.

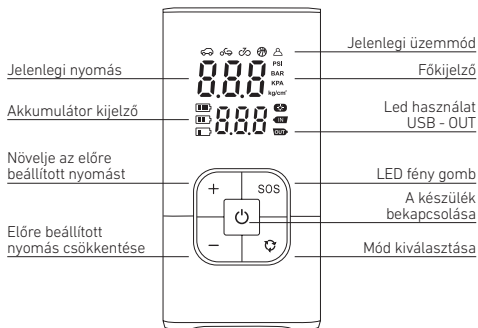

7. Nakoniec stlačte tlačidlo čím spustíte nafukovanie: automaticky sa zastaví, len čo sa dosiahne nastavený tlak.
