

## Taggy Kit

SKU: TETAGGYDUO

### **Object locators with anti-loss functions, tools to help find parked cars, proximity sensors and trackers, black and white colour**

This Taggy Kit consists of two Taggy key chains, which work together with the Go Tracker app. They will remind you not to leave behind your items when you're waiting for a train to the centre of town, and will also help you to find parked cars. When connected to the Go Tracker app, Taggy allows you to record the geographical position of objects, and allows you to display them with the app's map tool.

These anti-loss devices have four different functions:

1. An anti-loss function, notifying you when you are about to lose an object;
2. A parking function, to record the location of a parked car;
3. A proximity function, warns you not to forget about a registered object (like your luggage);
4. A tracker function, which stores geographic locations on a map.

But that's not all: If you cannot find your car keys because they are hidden in one of your desk drawers, just open the app and turn on the Taggy buzzer, which with its loud tone will help you find the lost object in seconds.

Taggy only works with the free Go Tracker app, which is available on the Apple [AppStore](#) and [Google Play](#).

Features:

- Bluetooth v 4.0
- Battery: 2xCR2016 (included)
- Range: 10 metres
- Compatible with iPhone OS 9 and higher, Android 4.3 and higher
