

## Mini TWS earphones with 200 mAh charging case

SKU: TEEARTWSTINYBTK

### The ultra-compact earphones that give you hours of music and calls

#### Compact size: take them with you everywhere

The **Tiny Twin earphones** are very small and can also be carried in a pocket without taking up too much space. Their **in-ear design** is also designed not to make them too bulky on your ears, offering a highly comfortable user experience.

#### True Wireless Stereo (TWS) technology: easy and wireless connection

They feature **True Wireless Stereo (TWS)** technology, i.e. **they don't need any wires** to connect to each other and to your **smartphone, tablet or laptop**. Thanks to the **autopairing** system, they'll also automatically connect to the device after pairing for the first time.

#### You can also call or record voice messages thanks to the integrated microphone

The Tiny Twins also give you the option to make calls. You won't have to unplug the earphones every time you receive a call, but will be able to talk to your caller directly from them.

#### The case allows up to four recharges without the need for additional power sources

The charging case not only protects the earphones but also charges them four times in a row. If the earphones are out of charge and you aren't near a power outlet or don't have a powerbank with you, no problem: **just place them back inside the base** and they'll be **fully charged again in 1½ hours**. The Tiny Twin earphones allow you to listen to your favourite tunes for four consecutive hours, but with the charging cradle **you can use them all day**. **When the case also runs out of power**, simply connect it to a charger via the included **USB-A to USB-C cable**.

## **The strap and touch controls included provide maximum comfort**

Inside the package you'll also find a handy removable strap to attach the headphones to a backpack or bag, or to wear them on your wrist without holding them in your hand. Built-in controls on the earphones also allow you to **play/pause a song, change a song, control the volume, answer/end/reject a call** and even **activate the voice assistant**. Control music and calls without taking your device out of your pocket.

### **Key features:**

- compact size
- wireless connection
- 200 mAh charging base
- True Wireless Stereo (TWS) technology
- auto pairing
- built-in microphone
- playback time: 4 hours
- charging time: 1.5 hrs
