100 Watt GaN charging station

SKU: TECHGSTUSB2C100W

Allows you to charge up to 3 devices at the same time conveniently and quickly

The ultra-compact charging station for your desk in the office or at home

There **100 Watt GaN charging station** measures only 61 x 73 x 20mm. Despite its **small size**, the charger is **very powerful**, which is due to the high efficiency of the **Gallium Nitride (GaN)** of which it is composed. This semiconductor enables high performance and takes up little space: GaN accessories are much smaller than standard ones. Store it in a backpack, a handbag or in your laptop case, and always take it with you - even to the office.

Very powerful: fast charge up to 3 devices at the same time

By connecting it to a power source via the included **power cable**, you will immediately benefit from an **ultra-fast charge** of up to **100 watts** of power. The **USB-A port**, when used individually, delivers 30 watts of power and is ideal for **speakers, TWS headsets or smartwatches**. The **two USB-C ports** will charge the battery of a **smartphone** to 100% in 10 minutes, a **tablet** in 20 and a **laptop or MacBook** in 30 (charging times are approximate and depend on the device's battery being charged). These outputs charge at a power of 100 watts. Use a cable suitable for transferring high amounts of energy to achieve maximum charging efficiency. You can also charge 3 devices at the same time: in this case, the energy will be divided between the ports, reaching a total of 100 Watts.

Safe power supply thanks to Power Delivery (PD) and Adaptive Fast Charge (AFC) technology

The 100 Watt GaN charging station is not only fast and compact, it is also **very safe**. In addition to the high efficiency of the GaN semiconductor, which ensures high heat resistance and lower energy dispersion, the technologies included in the charger guarantee maximum safety for your device. The Power Delivery (PD) technology present in the USB-C ports and the A Adaptive Fast Charge (AFC) technology present in the USB-A port regulate the power output depending on the device being charged. In this

way, it is possible to transfer large quantities of energy without overheating and short circuits.

Key features:

- with gallium nitride (GaN): smaller than a standard power station but very powerful
- Dimensions: 61 x 73 x 20mm
- maximum power: 100 watts
- also charges compatible laptops with USB-C charging enabled
- a 30 Watt USB-A port with Adapative Fast Charge (AFC) technology
- two 100 Watt USB-C ports with Power Delivery (PD) technology

Includes:

- 1 IEC power cord with European plug

100 Watt GaN charging station
SKU: TECHGSTUSB2C100W

Technical data

Output power: 100W
Input: 100-240 V A.C. 50/60 Hz - 1.5 A
Output: 100W max
Connector: 1 USB TYPE-C PD, 2 x USB A female
Plug type: European, IEC female
USB Output: 30W
Charging type: Fast, Power Delivery
Input voltage: 100V - 240V A.C. 50/60 Hz 1.5 A
Type C output: 100W
Included accessories: Power cable
Color: black
EAN: 8018417452420
SKU: TECHGSTUSB2C100W
Weight: 250 g
Maximum output power: 100 WATT
