HEART RATE

Go Life

In-ear sports earphones with heart rate monitor, flexible ear hooks, answer/end call button, microphone and volume control

FOLLOW YOUR HEART

The heart of technology beats inside the **Heart Rate Runner** sports earphones. These Bluetooth headphones are designed for physical activity, allowing you to not only answer incoming calls and listen to music, but also to monitor your heart rate.

PRACTICALITY BY YOUR SIDE

Playing sports and keeping fit is easy with Heart Rate Runners. These extremely lightweight earphones are equipped with **ergonomic ear hooks** that ensure maximum comfort. Each pack comes with three pairs of silicone rubber ear tips (one already attached to the earphones) in different sizes: choose the size that best fits you.

These running headphones have an integrated microphone and **volume adjustment** keys: never miss a call and have fun with your favourite songs while you work out.

This wireless headset is also **IP5X** certified, making it guaranteed to function in dusty or sandy environments.

THE HEART OF TECHNOLOGY AND WELLBEING

This Bluetooth headset also boasts the inclusion of new technology to **measure heart rate** through the eardrum. Thanks to an internal sensor, the Heart Rate is able to measure the user's pulse and transmit it via Bluetooth to the **Go Life app, available to download for free from the App Store and Google Play Store.**

Heart rate monitoring is important: you can increase or decrease the intensity of your workout to find the ideal pace.

ALWAYS WITH YOU

When the earphones run out of power, you can re-charge using the **Micro USB** cable included in the pack.

The practical **soft case** allows you to store the headphones once you have finished your workout. Ideal for those who like to face any challenge!
