

MagSafe-compatible magnetic car holder

SKU: TESUPMAGRING

Drive in complete safety as this support keeps your smartphone stable

Magnetic MagSafe-compatible base

This **magnetic car holder** was designed to keep your **smartphone** completely stable while driving. The **circular base** magnetically secures the phone: simply attach the **adhesive metal plate** (included with the holder) to the body of the smartphone or insert it inside the cover. If you have an iPhone with **MagSafe** charging, you don't need this plate: simply bring the phone close to the holder and the magnetic force of the MagSafe module will attract it.

Universal: it can be used with any mobile phone

Use with Apple, Samsung, Huawei, Xiaomi, Oppo or other brands of phone. Follow the GPS directions and answer hands-free calls securely and safely.

It can be attached to any air vent, including circular ones

Thanks to the practical **adjustable clip**, you can attach the holder to your car's air vent. If you only have **circular vents**, no problem: the metal clip will ensure your phone is securely in place.

360° rotatable

Position and adjust your phone the way you like it thanks to the 360° adjustable base. This way you can take advantage of your device's full screen view.

Key features:

- Suitable for every smartphone
