

## 10,000 mAh Pocket Power Bank

SKU: TEBB10000POCLCDK

**10,000 mAh battery charger, Intelligent Charge, Dual Charge, 2 USB outputs of 1A and 2.1 A, Micro USB input, 1 Type-C input/output of 2.1 A, black colour**

### INNOVATION IN THE PALM OF YOUR HAND

The **10,000 mAh Pocket Power Bank** is the best solution if you're looking for an accessory that's compact but still offers great performance.

Apart from its small size and incredible lightness, it has an additional distinguishing feature: the Type-C port can recharge the charger itself, or charge your smartphone and tablet.

### POCKET-SIZED TECHNOLOGY

This compact Power Bank is **Dual Charge** – you can recharge it at the same time as you power other devices.

Thanks to **Intelligent Charge** technology, this charger is able to automatically recognise the maximum recharge power your device can handle, adjusting it accordingly. In a short time, your device will be given the maximum charge while avoiding the risk of overheating. In just 30 minutes, your device's energy level will be up at **50%**.

You can constantly keep an eye on the Power Bank's rate of charge via the handy LCD display.

### MULTIPLE CHARGING SOLUTIONS

Powers **two devices simultaneously** thanks to its two USB outputs, 2.1 A and 1A.

The **Type-C port** allows you to recharge your device – tablet or smartphone – but also to recharge the charger itself via a cable with the same type of connector.

### TRAVELLING WITH YOU

The Pocket Power Bank is easy to recharge – the USB to Micro USB power cable is already included in the package. You can even take it **on a plane, without restrictions** – power at your side, wherever you are.

**FEATURES:**

- Capacity: 10,000 mAh
- Pocket-sized and ultra-light
- Intelligent Charge
- Dual Charge
- LCD display
- Input: Micro USB port, Type-C
- Output: 2 USB ports of 1A and 2.1A; 1 Type-C 2.1A
- Lithium polymer battery
- Smartphone charge level after 30 minutes with Intelligent charge: 50%\*
- USB to Micro USB charging cable included

\*Charging times are indicative only, and depend on the battery capacity of the recharged device.
