

Harmony Stereo Earphones - Wireless and Wired

SKU: TEJZARMONYBTK

Metal stereo earphones with two controller-equipped adapters for use in wireless or wired mode.

TWO PERFECTLY HARMONIOUS STYLES

The *Harmony stereo earphones* can either be used **wirelessly** or with a **jack cable**, according to your needs.

These **elegant metal accessories** come with two controller-equipped adapters so that you can choose the ideal listening mode.

WIRELESS STYLE

Choose the **wireless adapter** when you want to be wire-free whilst listening to music or want to be able to answer calls immediately. Insert the wireless adapter plugs into the 2 metal earphone bodies: manage music, calls and adjust the volume via the **controller** on the strap. Pair the Harmony earphones with your device by accessing your smartphone's Bluetooth settings.

The controller is equipped with a Micro USB port for charging: use **the supplied cable** to charge it once its power has run out.

JACK CABLE: WHEN IT IS USEFUL

The two metal Harmony earphone bodies can also be connected to the **controller-equipped adapter and jack cable**. Insert the jack into your smartphone or use it to connect the earphones to a speaker, music player, stereo or **non-wireless compatible devices**. Are you unable to immediately charge your wireless controller, yet still want to answer incoming calls or listen to voice messages? We have the right solution for you.

The wire is **120 cm long** to ensure great versatility: sit in an armchair while the music playback device is on a nearby shelf. The controller button can be used to accept calls, reject them or redial the last number.

COMFORT AND STABILITY

3 pairs of different-sized earbuds (S, M, L) are included in the package (2 are pre-mounted), so you can choose the most comfortable solution. **2 silicone headbands** are also provided which ensure maximum stability during use.
