

Note TWS wireless stereo earphones

SKU: TEJZEARNOTEBTWSK

Wireless stereo earphones in metal with 420 mAh charging base, Bluetooth V5.0, touch control, music auto play/pause

MUSIC, STYLE AND TECHNOLOGY WITH NOTE

An engaging sound and a modern design combine with intriguing technological solutions. **The Note TWS stereo earphones** are ideal for listening to music and answering phone calls: the **pocket-sized base** not only means that you can put them away, but you can also charge them when they run out of power.

INNOVATION: MUSIC TO YOUR EARS

The Note wireless earphones have a sophisticated metal finish, with an innovative, hi-tech soul. Thanks to the **auto play/pause system**, you can pause your tracks simply by removing the earphones from your ears: the track will automatically pause. When you put them back in, the track will start playing from the exact point at which it was paused.

SINGLE SOLUTION FOR MUSIC AND CALLS

These Note accessories boast **TWS (True Wireless Stereo) technology**: the earphones **connect to each other wirelessly** and to your smartphone simply by going to the Bluetooth settings on your device.

This means that you can enjoy your favourite tracks or answer your calls using the built-in microphone. The **touch control** enables you to manage your music, to accept or reject phone calls or to dial the last number if you wish. The sound is **stereo**, i.e. it comes from both earphones, when listening to music and when on a call.

THE ESSENTIAL POCKET-SIZED BASE

The pocket-sized base not only acts as an excellent **case**, but is also a **charger**.

When you put the Note earphones back in their case they will automatically turn off. They will turn on again as soon as you take them out, without pressing any buttons.

When the base has run out of power, you can charge it using the **USB-Type-C cable** included with the product.

FEATURES:
