

## Beat Air - Fitness tracker with notifications, heart rate monitor and pedometer

SKU: GLBEATAIRBTK

**Download the Go Life app to really make the most of it: find all the information you need on your wrist**

### The ultimate fitness tracker

The **Beat Air** lets you access many standard smartphone features on your wrist in a convenient and easy-to-use manner. Download the **Go Life app** and pair your tracker with your **Android (version 6 or higher) or iOS phone (version 10 or higher)**. Thanks to the full **touch** screen, a range of options are just a tap away.

### Check your notifications and alarms directly on your wrist

In addition to the date and time, the **Beat Air** allows you to quickly check your **message and call notifications** with a simple tap. If you want some peace, select the "do not disturb" function to silence your alarms. Thanks to the **"find watch" and "find phone"** functions, you will never lose your watch or smartphone. You can also use the tracker to set **alarms**: the Beat Air will ring when your chosen time comes around. It can even be used as a remote control to **take photos and videos remotely** via your smartphone.

### The ideal companion for all your sporting activities: track your progress and monitor your health

This watch is the perfect choice for sport and fitness. The Beat Air monitors several important factors to assess your daily wellbeing, such as your **heart rate, calories burned, steps taken** during the day, and even your **sleep quality**. All the data collected is available on the Go Life app, **Apple Health** or **Google Fit**.

### **You can even use it for swimming or in the rain**

The tracker is **IP65 certified**, which means it is **protected against water jets**, rain, dust and sand. It is therefore suitable for every situation and any weather conditions.

### **Key features:**

- 1.83" full touch screen
- adjustable strap with a buckle
- remote control for taking photos and videos
