

DJ UP Wireless Headphones

SKU: TTHEADPHONEDJUP

Wireless headphones with integrated microphone and answer button, able to be connected with the free Go Tune app

With the **DJ UP wireless headphones**, you can listen to your favourite music wherever you are. Once you've linked your smartphone (either Android or iPhone) to your tablet or your PC, you will be able to **listen** to and **manage your music uninterrupted**, even if you move away from your device.

These wireless headphones are perfect for everyday use: the **padded earpieces** have a 4cm diameter, making them **extremely soft** and able to cancel out background noise.

The **adjustable headband** has been covered in faux crocodile leather to both ensure **durability** and a unique look.

DJ UP wireless headphones can be connected wirelessly to your devices, keeping the connection within a 10-metre radius.

From the side of the earpieces, you can control the on/off switch, alter the volume, change the track and even answer or end a call. You can manage your music and answer calls with one simple move.

Enjoy up to 5 hours of battery life across these wireless headphones. Once the battery has drained, simply **recharge** it using the micro-USB charging cable included in the box.

For best results with your DJ UP wireless headphones, we advise downloading the **Go Tune app** which is arrived on the [Apple AppStore](#) and [Google Play](#). Developed by SBS, the app allows you to change the music frequency and equalisation settings depending on **personal preference**.

The image block contains three distinct visual elements. At the top, a close-up of the earcup shows the control panel with a power button and volume controls. Below this, a technical diagram indicates a diameter of 4 cm for the earcup and identifies the multifunction controls. The middle section features a side view of the headphones with a red accent on the headband, accompanied by text about connecting to the Go Tune app. At the bottom, a man is shown wearing the headphones, with text about playing music wirelessly.
