

Wireless light kit and smartphone holder for handlebars

SKU: TEERLIGHTHOLDBT

The kit dedicated to your safety when travelling by bike, e-bike or scooter

Use it on any bike, e-bike, scooter or Segway

The **light kit and stand** is dedicated to sustainable mobility. It is made up of one **wireless light**, a **remote control** to control it and a **mobile phone holder**. You'll always be as safe as possible while on the move.

The rear light is wireless and controllable from your handlebar

Affix the **safety light** in the **rear** part of your bike and then affix the remote control to the handlebar. These two accessories will communicate with each other without the aid of wires. Use the **middle key** of the remote control to choose the setting **mode** for the light: **solid red central light**, **flashing red central light** or you can set **the whole light to flashing**. When you want to **indicate your turning direction** to the vehicles behind you, use the arrows above the central button. The remote will even signal changes of direction **audibly**. The light **stays charged** for a good **8 hours** and, when the battery is empty, you can recharge it using the **USB-A - Micro-USB cable included**.

The phone holder brings stability and practicality

The **mobile phone holder** is suitable for **smartphones up to 7"**. Affix it to the handlebar and hook up your phone: it will remain stable and won't be moved by vibrations. It is also **360° adjustable** to allow you to position the smartphone horizontally and follow GPS directions as easily as possible. When you want to remove the phone, press the button in the centre of the holder.

Suitable for any situation and weather

The light kit is certainly very useful at night to be seen clearly and during the day to signal a change of direction. Being **IPX2 certified**, the light is also rain resistant. This way, you can always enjoy its benefits.

Key features:

- safety light with 5 lighting modes
- battery: 900 mAh
- charging time: 3 hours
- operating time: 8 hours
- standby time: 36 hours
- IPX2 certified: rain resistant
