

## Light kit and smartphone holder for handlebars

SKU: TEERLIGHTSHOLD

### Traveling by bike and scooter will be safe at any time, even at night

#### All-purpose and designed for sustainable mobility

This **kit** will help you to get around safely on your **bike** or **e-bike** or with your **scooter** or **Segway**. Thanks to the **white front light** and the **red rear light**, you can get around anywhere even at night or early in the morning in low light conditions. The **smartphone support** will also allow you to keep your phone within sight at all times, but without distracting you.

#### Light up your path with the front light

The practical **white front light** for bikes is affixed to handlebars with a diameter from 12 to 32mm. It is equipped with a **5 Watt LED** that will light your path **up to 15 metres** in front of you. Thanks to the button, you can change the light to **3 modes** giving you the right lighting in every situation. The battery provides light for up to 3 hours of continuous use and, when it runs out of power, you can recharge it by connecting it to a power bank or a wall charger using the **USB-A - Micro-USB cable included**. The **IPX6 certification** also allows you to use it in the rain.

#### Be seen by other vehicles with the red rear light

The **red light** must be placed in the rear part of your vehicle. Press the integrated button to **change lighting modes** or turn it off. You'll have light up to 3 hours and you can recharge the battery using the included cable. Thanks to the **50 lumen headlamp** you'll be clearly visible to other vehicles even at night.

#### The mobile phone holder affixes easily to your handlebar

The holder is suitable for **smartphones up to 7"**. Affix it to a handlebar from 23 to 28 mm in diameter thanks to the **adjustable strap**. Your smartphone will remain stationary and can be used safely at all times. Easily follow GPS directions or answer calls in complete comfort.
