UV Steriliser with ozone and 10W wireless charging

SKU: TEUVSTER10W

Dual-band ultraviolet steriliser with ozone, 10 watt fast wireless charging for Qi-compatible smartphones

DEEP STERILISATION AND FAST CHARGING

A single accessory to sanitise your pocket accessory and quickly recharge your smartphone wirelessly. The **UV steriliser with ozone** can **significantly reduce** the presence of germs, spores and bacteria and **quickly power your mobile phone without using wires**.

THE BENEFITS OF OZONE

To achieve significant sanitation - reducing germs, spores and bacteria that lurk on surfaces - it is estimated that the wavelength of UV rays must be below 280 nanometres.

The steriliser is equipped with a dual band that emits rays at 254 and 185 nanometres. The 185nm lamp produces a small amount of ozone, which sanitises the shaded parts that the UV light doesn't reach.

It's also simple to use: just connect this accessory to a power supply using the cable in the package, and insert the object you want to sanitise into the dedicated compartment.

10 WIRELESS WATT CHARGING

To take advantage of wireless charging, your smartphone must be compatible with **Qi technology**. This protocol enables your device to recharge using the right amount of power and no wires.

The steriliser must be connected to a power source using the cable included in the package. Place your smartphone on top of the cover: the power will start once the button is pressed. The power reaches around **10W**: in 30 minutes, your device's charge level

will be **50%**.

WIRELESS STERILISATION AND CHARGING SET UP

This steriliser enables you to sanitise not only devices such as smartphones, smart watches, data cables and wireless headphones, but also accessories such as keyrings, wallets, bracelets and rings. Wireless sterilisation and charging can be **started and performed simultaneously**.

You can make various choices using a button to select the times and actions the steriliser must perform:

- 18- or 30-minute sterilisation
- 18- or 30-minute sterilisation with wireless smartphone charging

Sterilise a single device or opt to sanitise one of your accessories while your mobile phone recharges wirelessly.

FEATURES:

- Technology: UV - the 185nm lamp produces ozone
- Wavelength: 253.nm / 185nm
- UV power: 2w
- Wireless charger: 10W Fast
- Operating time: 18min / 30min
- Sterilisation area: 190 x 102 x 35mm
- Smartphone charge level after 30 minutes: 50%*

*times are approximate and depend on the device recharged.

UV Steriliser with ozone and 10W wireless charging
SKU: TEUVSTER10W

Technical data

Wavelength: 253,7 nm / 185 nm
Sterilization area: 190*102*35 mm
Technology: UV - the 185nm lamp produces ozone
Wireless Output: 10W
EAN: 8018417304460
SKU: TEUVSTER10W
Weight: 394 g
UV power: 2 WATT

Logistics data
